

Dear FCC:

I am an avid XM listener and I believe its the best thing that somehow keeps on getting better. I got it for the quality and the no commercial music. But then they added the traffic and weather channels in the bigger cities. I spend 10 to 15 minutes listening to regular radio to hear maybe a 15 or 20 second spot about traffic and thats it. Usualy i dont even hear what i need to hear when im going through atlanta. But they are going to offer an exclusive traffic station to atlanta and i need it badly because of the updates. Please let XM continue to provide the excelent service going and expanding the company. For the people that pay for this subscription we deserve it for being loyal listeners. Thank you guys for listening!
